

# Poured-in-Place

**Pretty,  
pourable and  
perfect** for  
any surface

Poured-in-Place is ideal for playgrounds, golf cart paths, jogging paths and tracks, pedestrian bridges, putting greens, gym floors, theme restaurants, pool decks, childcare centers, and anywhere that needs slip-resistance specialty flooring.

Poured-in-Place is mixed and poured on site, so that it can be custom molded into a wide range of shapes and thickness. It boasts a porous, monolithic two-component surface that allows for free-form designs while meeting safety standards and special architectural and aesthetic requirements. Its unique surfacing is locked with an elastic polyurethane binder specially formulated for installation over aggregates like asphalt, concrete, or stone. Its cushion underlayer varies in thickness to buffer falls up to twelve feet and is capped with a durable Virgin EPDM Rubber Wearing surface. This product allows you to add play value with any combination of designs such as: Hopscotch, tetherball, geometric shapes, alphabets, numbers, and theme-scapes. The benefits are many:

- Mixed and poured on-site
- Allows for customized free-form designs, including school colors, logos, graphic, and more
- Environmentally safe
- Extremely durable and long lasting
- Vibrant, non-toxic, non-staining colors
- Certified to comply with CPSC Standards, as well as ASTM and ADA guidelines
- Installation is backed by a 5-year guarantee
